

kensaheatpumps

Installer Programme 2009

THE COMPANY: Kensa Engineering is the only UK manufacturer, of a complete range of ground source heat pumps and has mentored the majority of installers on the original Clear Skies programme (now Low Carbon Buildings Programme). Established 10 years, Kensa partners with installers to provide its extensive range of MCS accredited heat pumps for domestic and commercial properties. The installer programme offers, discounts, referrals and UK based technical support every step of the way.

THE COURSE: A full day of hands-on workshops and technical seminars, delivered by the industry's leading experts in ground source heat pump systems. The course, held monthly, is designed to support installers, whether you are new to the technology or looking to further improve your skills and grow your business.

THE DATES: Thursday April 23rd, May 21st, June 18th, July 23rd, August 20th

Key topics covered:

- * Ground Source Heat Pump technology
- * The Kensa range
- * Application engineering (heat pump sizing) and projects to avoid
- * Ground array designs
- * Hands-on laying of Slinky ground arrays, purging and filling
- * Installation incl. electrical control wiring and primary pipe work
- * Hands-on commissioning
- * Connection with radiators and/or underfloor heating and their controls systems
- * Domestic hot water options
- * Integration with other renewables
- * Grant support
- * Benefits of the approved installer scheme

Ideal location:

Kensa's Truro manufacturing facility is based on a 22 acre, former Cornish Tin Mine; Mount Wellington. The site is ideally suited for workshops and tour of heat pump production. Easily access by car, train or plane -30 minutes from Newquay airport or 90 minutes from Exeter airport.
